SUMMARY

Full Stack and Flutter Developer with hands-on experience building scalable web applications and high-performance cross-platform mobile solutions. Skilled in RESTful API integration, responsive UI engineering, and performance optimization. Experienced in delivering production-ready applications with clean architecture, efficient state management, and measurable improvements in speed and usability. Strong collaborator in Agile environments with a focus on reliability and user-centric design.

EXPERIENCE

App Developer Trainee, Atmez AI Solutions	01/2026 – Present Hyderabad, Telangana
• Built Flutter-based user interfaces for Employee Management System (EMS) and Master Admin applications • Crafted responsive, role-based UI components for dashboards, attendance tracking, and employee workflows • Integrated REST APIs using HTTP/Dio with a MySQL backend • Implemented Provider-based state management for efficient UI updates • Optimized rendering performance, improving UI responsiveness by 20–30% • Collaborated in Agile teams for feature delivery, debugging, and iterative improvements	
Full Stack Trainee, Zenexis Solutions	02/2025 – 06/2025 Bidar, Karnataka
• Engineered 2+ full-stack web applications using the MERN stack • Built and deployed TaskHive, a task management platform with 15+ REST APIs and real-time data handling • Optimized backend performance using Mongoose, reducing response time by 30% • Implemented secure file upload functionality using Multer and configured CORS for cross-origin access • Developed responsive front-end interfaces using React.js, Vite, Bootstrap, and Ant Design • Contributed to Agile workflows including sprint planning, code reviews, and debugging	

EDUCATION

Bachelor of Technology in Computer Science, Visvesvaraya Technological University (VTU)	06/2025 Belagavi, Karnataka
Pre-University Course, Department of Pre-University Education Karnataka	07/2019 – 07/2021 Bidar, Karnataka

SKILLS

Programming Languages

- JavaScript
- TypeScript
- Dart
- Java
- Python

Frontend

- React.js
- Next.js
- Vite
- HTML
- CSS
- Tailwind CSS
- Bootstrap
- React Bootstrap
- Ant Design

Development Tools

- VS Code
- Android Studio
- Postman

Backend & Database

- Node.js
- Express.js
- Flask
- RESTful APIs
- Redis
- MongoDB
- PostgreSQL
- SQL

Mobile Development

- Flutter
- Android Development (Material UI)

Version Control System

- Git
- GitHub
- GitLab
- Bitbucket

PROJECTS

Employee Management System (EMS) • Built a Flutter-based system for managing employee tasks, attendance, and profiles • Structured reusable UI components to improve scalability and maintainability • Integrated REST APIs with MySQL backend using Dio • Enhanced performance by reducing unnecessary widget rebuilds and optimizing rendering	Present
TaskHive • Engineered a MERN-based application supporting task management, lead tracking, and scheduling • Implemented RESTful APIs with secure file handling and optimized database queries • Improved API response speed by 30% through query optimization • Developed a responsive UI using Ant Design and ensured secure cross-domain communication	06/2025
BloodHub • Built a full-stack MERN platform for blood donation coordination • Automated donor-recipient matching workflows, reducing manual effort by 30% • Scaled the system to handle 100+ concurrent requests with high reliability • Ensured data consistency and performance across multiple user roles	04/2025
